

# MEET THE FAB FIVE

BORN 7 OCTOBER 2009

We have arrived. We just couldn't wait to come into the world. Wednesday was a big day what with being born, meeting humans and most importantly snuggling with our Mom. We had an easy delivery. It all started off around 1 PM and by 4:45 it was over. Mom was great and made it so easy for us. There are five of us - four boys and one girl. All of us weighed more than 11 ounces - some even 13! Mom's milk is so good and yummy. She is constantly licking us and making sure we are ok. We have a heat lamp on to keep away any chills. The humans keep a close eye on us and even have a baby video monitor to watch us from upstairs.

On Friday we went on our first car ride and visit to the vet. Dr Rick Brown gave us the once over and also removed our dew claws. He froze them first and before we knew what was happening it was all over. We had a great time as all the staff were enthralled with our being so cute and couldn't resist holding and cuddling us.

Some of the adult Cardis' have already visited with us. They seem really nice. We all got the sniff over with their tails wagging.

Boy this is the life. We can hardly wait to start exploring and meeting everyone...

Stay tuned every Sunday (starting the 18th) for updates on the 'Fab Five' and their adventures...

## THE FAB FIVE
